Tan Binh, Ho Chi Minh

Education

Information Technology

2021 - 2025

Industrial University of Ho Chi Minh City

Focused on software engineering , object - oriented programming , data structures , and computer networks . Gained hands - on experience with game development projects using Unity and C # , along with team collaboration and version control tools like Git , SourceTree , ...

Skills

Programming & Technologies

- **C#**, **Java**, **HTML/CSS/JavaScript**
- **Version Control**: Git, GitHub, SourceTree, Fork,...
- **Unity 2D/3D** (gameplay, UI, animation, shaders)

Objective

Unity Game Developer & Playable Ads Developer with hands-on experience in building mobile games and interactive playables using Unity/C# and HTML5. Strong focus on core gameplay design, user experience, and performance optimization for user acquisition campaigns. Seeking opportunities to contribute to both game design and playable ad production in data-driven, creative teams.

Work experience

Mobile Playable Developer — **Aug 2025 - Present**

Amanotes

- Develop and optimize **playable ads** using **Unity/C#** and **Luna** across multiple game projects, owning work from early brainstorming and new template development to creative iteration, delivery, and performance tracking.
- Built and standardized internal **tools, frameworks, and production workflows** helping the playable team move faster, reduce manual effort, and scale production more efficiently.
- Partnered closely with **UA, CS/Account, and cross-functional stakeholders** to align hypotheses, strategy, briefs, and playable direction; contributed to new game pack brainstorming, creative briefing, and selected gameplay design decisions to support testing goals and user engagement.
- Contributed to team **documentation and workflow standardization**, including writing the **JD for the current role**, building a **probation roadmap for new developers**, and creating tracking/guideline materials to improve source management, handover clarity, and workflow consistency.
- Researched and explored **AI applications for playable production**, focusing on coding acceleration, refactoring, documentation, and workflow optimization, and evaluated how AI tools could be applied to real playable development use cases.
- Growing toward a **technical lead-oriented role** focused on **source and workflow management**, with an emphasis on standardizing branching rules, tracking systems, and scalable production pipelines for the playable team.

Game Developer — **Dec 2024 - Aug 2025**

MoPa Games

- Started as a Fresher and advanced to Junior Game Developer within two months.
- Developed and maintained 2D/3D game features using Unity and C#.
- Worked on gameplay systems, UI/UX, animation controllers, and event handling.

Playable Ads & Tools

- **Playable Ads Development** (Unity & HTML5)
- Optimization for **mobile web performance** (size, loading, responsiveness)
- Internal **Unity tooling**: templates, reusable components, automation
- Integration with **Luna** and internal playable pipelines

Game Design

- **Basic Game Design**: core loop, mechanics, pacing, feedback
- **Game Development Architectures** (State Machine, Object Pooling, MVC/MVVM patterns in Unity)
- **System Design for games**: progression, currency, difficulty curves
- **UI/UX for games & playables**: onboarding, hint systems, touch interaction, feel

Other

- English (reading & writing technical documents)
- Collaboration in small **cross-functional teams** (developer–designer–artist)

- Participated in game design discussions (core mechanics, difficulty balancing, level structure, player feedback).
- Optimized game performance and handled bug fixing across production cycles.
- Integrated advertising SDKs (Unity Ads, AdMob) and managed monetization logic.
- Served as the main developer in a 3-member team (1 designer, 1 artist), responsible for implementing core gameplay features and polishing user experience.
- Used version control tools (Git, GitHub, SourceTree) and task management platforms (Height).

Intern Game Developer **Jun 2024 - Dec 2024**

EBIZWORLD

- Participated in developing mini games using Unity and C#.
- Worked on UI implementation, gameplay logic, and basic animation
- Used Git for version control and task tracking

Projects

Unity Developer **2025 - 2025**

Pizza Mania: Slice Sort

Sole developer (5K+ downloads): developed full gameplay system, UI/UX, Unity Ads, AdMob, IAP, Firebase integration, and handled publishing on Google Play.

Unity Developer **2025 - 2025**

Cat Bus Jam: Seat out

Contributor (10K+ downloads): supported event programming and implemented various UI/UX elements in collaboration with team members.

Unity Developer **2025 - 2025**

Goods Match: Sort n Ship

Contributor (5K+ downloads): supported event programming and implemented various UI/UX elements in collaboration with team members.

Solo Playable Developer **2025 - Present**

Cat Dash: Cute Cat Music Game

- A 2D rhythm platformer where every move syncs with the music.
- Built beat-synced gameplay framework, responsive dash/jump controls with coyote time and input buffering.
- Reduced CPI by 70%, bringing the game from near-dead status to close to passing soft launch.

- Tested multiple hypotheses: portrait mode pivot (adopted by product team), wordless tutorial design, new visual effects & map redesign.
- Tech: Unity, C#, Luna, Spine, DOTween, Physics 2D, Particles, Tile Map

Detail: https://ondat2401.github.io/portfolio/#project=cat-dash-cute-cat-music-game

Solo Playable Developer **2025 - Present**

Magic Dance Star: Rhythm Tiles

- The company's first playable ad combining rhythm gameplay with 3D Audition-style dance mechanics.
- Multiple 3D character models optimized to keep total build size under 5MB.
- Currently in soft launch phase.
- Tech: Unity, C#, Luna, Animator, DOTween, 3D Shader, Particles

Detail: https://ondat2401.github.io/portfolio/#project=magic-dance-star-rhythm-tiles

Playable Developer **2025 - Present**

Tile Hop: Music Ball Clash

- A 3D rhythm music game with beat-synced tile spawning based on BPM and precomputed beat maps.
- Implemented responsive drag controls, camera follow, and assist features (auto-aim tolerance, coyote time).
- Optimized object pooling, mesh batching, and lightweight shaders for stable 60fps on mobile.
- Tech: Unity, C#, Rhythm, URP, DOTween, Luna, Particles, Shader.

Detail: https://ondat2401.github.io/portfolio/#project=tile-hope-music-ball-clash

Playable Developer **2025 - Present**

Dancing Road: Color Ball Run

- A 3D rhythm-based color ball runner with beat-driven track system and color-state logic.
- Tech: Unity, C#, Rhythm, 3D Shader, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=dancing-road-color-ball-run

Playable Developer **2025 - Present**

Magic Tile 3: Piano Music Game

- A fast-paced piano tiles rhythm game with timing-accurate input system and combo logic.
- Tech: Unity, C#, Rhythm, 2D Shader, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=magic-tile-3-piano-music-game

Playable Developer **2025 - Present**

Duet Cats: Cute Music Game

- A minimalist rhythm-based arcade game with twin-orbit control system.
- Tech: Unity, C#, Rhythm, 2D Shader, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=duet-cats-cute-music-game

Solo Playable Developer **2025 - 2025**

Mega Market Idle

- A compact idle-management game with data-driven upgrade systems and economy balancing.
- Tech: Unity, C#, Idle, Economy Design, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=mega-market-idle

Solo Playable Developer **2026 - Present**

Decor Room: Animal Music Party

- A cozy music-decor game with modular decor system and audio layering.
- Tech: Unity, C#, Puzzle, 2D Shader, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=decor-room-animal-music-party

Solo Playable Developer **2025 - Present**

Tap Music Gallery

- A rhythm-based tap gallery experience with beatmap-driven tap system.
- Tech: Unity, C#, Puzzle, DOTween, Luna, Particles

Detail: https://ondat2401.github.io/portfolio/#project=word-music-explored
